Introduction

In the present era of planning, the importance of Agricultural Statistics as a prime mover becomes unequivocal. In the new strategy for Agricultural Development the importance of Agricultural Statistics as a reflector of economic progress is very vital. Due to lack of sufficiently, comprehensive and reliable data, the planning and execution of Agricultural programmes is often handicap as a planning in our country has hitherto been on an overall programme basis and that too for relatively larger administrative units.

Agricultural Census

Agriculture provides gainful employment to nearly two-third of the population and contributes about 30% to the National Income. It also earns valuable foreign exchange and supplies raw materials to various key industries. Recognizing the predominance of the agriculture sector in the Indian
