

122 Singh, Gurmeh, Ram Babu and Chandra, S. 1981. Soil Erosion Prediction Research in India. Bulletin No. T-12/D-9, CSWCRTI, Dehradun. 70 p.

In this bulletin, specific values for various parameters of the Universal Soil Loss Equation (USLE) under Indian conditions have been worked out. For this, soil loss data collected at CSWCRTI, Dehradun and other sources have been made use of. In some cases, the factors developed are only the first approximation because of paucity of relevant information. The estimation provided in the bulletin could be used to assess the gross soil erosion under different soil-crop-management conditions in the country.
