

1990. Bhardwaj, S.P. 1990. Simple, economic and productive treatment of inter-row space in crops for soil conservation. Abstract, Internl. Symp. on "Water Erosion, Sedimentation and Resource Conservation", Dehradun, Oct. 09-13, 1990: 84.

The paper discusses various soil conservation techniques and indicates with the support of research data that inter-row space can very well be put under productive and protective use by following suitable soil and water conservation measures such as minimum tillage, interculture and intercropping with erosion resisting crops.
