

216. Dhruva Narayana, V.V. and Prasad, B.S.N. 1990. *Mati aur jal na mile 'mati' mein. Kheti*, 44(1):6-8.

Describes soil and water conservation technology for agricultural lands as well as non-

agricultural lands in different regions of India. Under the mechanical measures, construction of various conservation structures such as contour bunds, bench terraces, conservation ditches, farm and village ponds for collection of rain water and other structures have been described. For non-agricultural and degraded lands, biological measures like agro-forestry, tree plantations, agri-horti, agri-silviculture, agrostology, etc. for production of food, fodder and fuel have been suggested.
