

299. Mittal, S.P. and Ramanath, B. 1971. Evaluation of new chemicals for control of shootfly in *jowar*. *Sorghum Newsletter*, 14: 59-60.

Effect of different chemicals (Carbofuran, Thimet, Solvirex, Rogor, Cytrolane and Control) in the control of shootfly on CSH-1 sorghum was determined. Thimet 10 G @ 25 kg/ha proved most effective (only 10.1% incidence) in controlling the shootfly damage.
