

fruits, economic gains, etc. have been described.

613. Arora, Y.K. and Dhruva Narayana, V.V. 1987. Cultivation of fruits in the denuded Doon Valley. *Indian Hort.*, 32(1):13-16.

Cultural operations, improved moisture conservation techniques and yield potentials of fruit types including sweet orange, lemon, mandarin, sweet lime, pummelo, plum, guava and minor fruits grown on good and degraded riverbed lands in Doon Valley have been presented. Economics of lemon and mandarin 'kinnow' raised on bouldery wasteland has also been worked out.
