

Acacia nilotica along with Dalmanella grows

666. Gupta, R.K. 1974. Synecology of the grass covers and parallelism with forest

types in Garhwal Himalayas. *Indian For.*, 100(8):499-509.

A detailed account of grass covers of the Garhwal region in West Himalaya has been given and discussed under submontane, montane, altimontane and alpine zones. *Heteropogon contortus* and *Arundinella* types of covers in submontane, *Themeda*, *Chrysopogon gryllus*, *Poa pratensis* and *Koeleria cristata* types in montane and *Danthonia*, *Phleum*, *Agrostis* types are included in altimontane and alpine types. Some of the grass communities and alpine types recorded from the area are described alongwith their altitudinal distribution and parallelism with different forest types.
