714. Pradhan, I.P., Dayal, R. and Vasava, S.S. 1977. Teak plantation in Mahi ravine lands and their economic evaluation. *Soil Cons. Digest*, 4(1):10-16.

The paper deals with the economics of teak plantation raised at Vasad (Gujarat) in the ravine lands. The cost of plantation was worked out to be Rs. 1,000/ha as capital investment required for a rotation of 15 years assuming sale price of teak ballies @ Rs. 10/- each. Rs. 17,500 were obtained after deducting the cost of cultivation and the compound interest for 15 years. Net profit of Rs. 13,320/- was obtained per ha for a period of 15 years.
