

759. **Rama Mohan Rao, M.S. 1990.** Approaches to the management of denuded lands in the Peninsular India. In: Technologies for Wasteland Development, Eds. I.P.Abrol and V.V.Dhruva Narayana, ICAR, New Delhi: 232-244.

In the context of peninsular India, various constraints in terms of climate, physical features, soil types and the consequent soil erosion and sedimentation problems have been discussed. Then the paper describes different conservation measures for steep slopes, flat lands, swamps, gullies, hills, humid region of western ghats, semi-arid region, arid region, river beds, coastal areas, etc.
