

768. Sajwan, S.S. 1975. Ground flora and their distribution in forest plantation in Jamuna ravines. *Indian For.*, 101(5):269-275.

Results of a survey of ground flora in forest plantations of Jamuna ravine conducted at Agra have been presented. The study revealed minimum number of ground flora in plantations of *Prosopis juliflora* and *Dendrocalamus strictus* and the maximum in that of *Dalbergia sissoo*. *Apluda aristata* had maximum frequency and density in *Dalbergia sissoo*, *Acacia nilotica* and mixed plantation. Regeneration of *Dalbergia sissoo* was observed in all the plantations excepting *Prosopis juliflora*.
