

889. **Gupta, R.K. 1980.** Landuse regulations for flood control and watershed management in the Himalayas. Abst. 21, National Symp. on "Soil Conservation and Water Management in 1980's", Dehradun, March 12-13, 1980: 14.

Present status of the Himalayan catchments, particularly of the west Himalaya has been examined with regard to the environmental conditions, land utilisation, land management and soil erosion process. The results of improper landuse have been reviewed with regard to current land management practices. Conceptual model for existing man:land ratio and organisational pattern to implement landuse models under the watershed management programme have been discussed.
