

- 965. Tejwani, K.G. 1962.** Soil and water conservation in the ravine lands of Gujarat. *J. Soil and Water Conserv. India*, 10(1&2): 3-11.

The author emphasises that for controlling soil erosion in ravine lands improving their fertility status and to reclaim and develop the gully slopes and bottoms into grasslands, forests, orchards and cultivated lands, a systematic approach is necessary. Steps suggested include planning, preventive measures and reclamation process.
