

967. **Tejwani, K.G. 1976.** Trees reduce floods and promote human welfare. Sem. on the "Problems of Agrl. Dev. and provision of subsidies, occupation", Hill Area Development Agency, Tehri-Garhwal : 26-27.

In the paper, the author has highlighted the beneficial role played by trees in controlling the floods and helping the mankind in various ways. Trees regulate the disposition of rainfall in such a way that man not only gets more water for his use, but also gets it for longer period on a better regulated way and that the water is of better quality with less sediment.
