

storage are also described.

1062. Verma, B. 1978. Runoff water for black soils of Karnataka. *Indian Farm*

XXVIII(4): 36-37.

The paper discusses the possibilities of collecting excess runoff water into dugout ponds under semi-arid conditions in black soil region. The economics of utilizing this harvested water for the crops of *jowar* and cotton to augment soil moisture stress during crop growth is also given.
