

1252. **Subhash Chandra and Kurothe, R.S. 1989.** In Gujarat watershed droughts lose their sting. *Indian Fmg.*, 39(9):27-29.

The paper describes various soil and water conservation measures, agronomic practices, crop production and afforestation works adopted in the backward area of Navamota watershed in the Gujarat State. It highlights the success achieved in mitigating the ill-effects of drought in the area where developmental works were carried out according to the watershed management plan.
