

1268. **Dhruva Narayana, V.V. and Prasad, B.S.N. 1989.** Soil and water conservation for better land and water management. *Indian Fmg.*, 39(7):17-18.

The article highlights the role of watershed management particularly in India where soil erosion problems have assumed a serious dimension. It further deals with soil and water conservation technology for agricultural as well as non-agricultural lands, including ravines. Alternative land use systems such as agroforestry, agri-horti-silviculture, silvi-pasture etc. have also been discussed.
