

- 1307. Agnihotri, Y. and Mittal, S.P. 1985.** How sensitive is the economics of constructing small dams along Shiwalik foothills. Abstract No. 1, National Seminar on "Soil Conservation and Watershed Management", New Delhi, Sept. 17-18, 1985: 1.

This paper presents economic analysis of watershed management programmes with nuclei as the newly constructed dams in Haryana and Himachal Pradesh and discusses the sensitivity of the Benefit Cost ratio (B/C) of the projects. The B/C of the projects under study varies from 1.4 (Nada dams I and II jointly) to 5.32 (Behdala and Chatara).
