## FOREWORD

Agricultural research is a pivot for planned growth and sustainable development of agriculture in the country. Indian Council of Agricultural Research (ICAR) is an apex organization in the field of agricultural research at national level which plays a crucial role in promoting and accelerating agricultural research, education, extension and support in demonstrating the use of new technologies in agriculture.

The data generated by ICAR on various aspects of agriculture and allied disciplines is being used by various stakeholders such as policy makers, statisticians, economists, researchers, students, extension workers, entrepreneurs, industrialists, progressive farmers and the general public. Agricultural Research Data Book (ARDB) is an important ICAR publication which provides valuable information in the form of comprehensive compendium regularly on annual basis. This publication is widely used as a reference book for data on various aspects of agriculture and its allied sector. The ARDB is a rich source of data on area, production, productivity, land-use statistics, horticulture, animal husbandry, fishery etc.

The present issue of Agricultural Research Data Book 2019 has been updated with the latest available data. It is anticipated that this publication will continue to serve as a reliable source of information on various aspects of agriculture. I welcome the comments/suggestions from users to improve the quality of this publication. I compliment the Education Division of ICAR especially the ICAR-Indian Agricultural Statistics Research Institute (ICAR-IASRI) for their efforts in bringing out this Agricultural Research Data Book 2019.

## आमुख

देश में भारतीय कृषि अनुसंधान परिषद (भाकृअनुप) कृषि अनुसंधान और शिक्षा के संगठन एवं प्रबंधन के लिए एक सक्रिय संस्था है और देश की आजादी के बाद से कृषि के समग्र विकास की दिशा में एक महत्वपूर्ण और प्रभावी भूमिका निभा रही है।

विभिन्न स्रोतों से उपलब्ध कृषि अनुसंधान, शिक्षा और सम्बद्ध पहलुओं से सम्बंधित सूचना अनेक प्रकार के प्रकाशित एवं अपुकाशित रिकार्डों में अलग अलग जगहों पर उपलब्ध हैं। इन अलग अलग जगहों पर उपलब्ध सूचनाओं को 1995 से कृषि अनुसंधान डाटा पुरितका में भाकृअनुप-भारतीय कृषि सांरिख्यकी अनुसंधान संस्थान (भाकृअनुप-भा.कृ.सां.अ.सं.) एवं भारतीय कृषि अनुसंधान परिषद के संयुक्त प्रयासों के माध्यम से संकलित किया जा रहा है। यह कृषि अनुसंधान डाटा पुरितका 2019 अपने प्रकाशन की श्रंखला में बाईसवाँ संस्करण है। डाटा पुरितका को प्रयोक्ता की सुविधा के उद्देश्य से 10 भागों में विभाजित किया गया है। यह प्राकृतिक संसाधन, कृषि निविष्टि, पशुपालन, डेरी उद्योग, मत्तियकी, बागवानी, उत्पादन, उत्पादकता, कृषि अभियांत्रिकी, नियर्त, आयात, विश्व कृषि में भारत का स्थान और मानव संसाधन पर नवीनतम सूचनाएँ उपलब्ध कराती है। कृषि के विभिन्न पहलुओं पर इसमें 173 तालिकाएँ हैं। कृषि अनुसंधान डाटा पुरितका में भारत में उपलब्ध जून 2019 के अंत तक के नवीनतम ऑफ़लाइन हैं।

कृषि अनुसंधान डाटा पुरितका का प्रथम संस्करण वर्ष 1995 के अन्त तक की सूचनाओं के आधार पर वर्ष 1996 में प्रकाशित किया गया था। इसके बाद से इसका प्रकाशन नियमित रूप से उपलब्ध नवीनतम आंकड़ों को अद्यतन करके प्रतिवर्ष किया जा रहा है। कृषि अनुसंधान डाटा पुरितका 2019 में लिये गये गत वर्षों के आंकड़ों के आधार पर सांरिख्यकीय मॉडलों के उपयोग द्वारा भावी वर्षों में खाद्य पदार्थ, फसलों इत्यादि के उत्पादन का आकलन, आंकड़ों की सचित्र/ग्राफिकल प्रस्तुति एवं विभिन्न प्रकार के राज्यवार आंकड़ों का शौगोलिक सूचनातंत्र पद्धति द्वारा मानचित्र बनाकर मूल्य वर्धन किया गया है। उपयोगकर्ताओं के बीच व्यापक रखीकार्यता होने के कारण कृषि अनुसंधान डाटा पुरितका की एक सॉफ्ट कॉर्पो हमारी संस्थान की वेबसाइट [www.iasri.res.in](http://www.iasri.res.in) पर अपलोड की गई है। हम आशावान हैं कि कृषि अनुसंधान डाटा पुरितका 2019 में प्रस्तुत सूचना पाठकों के लिए लाभप्रद होगी। इस डाटा पुरितका 2019 में विभिन्न प्रयोक्ताओं से प्राप्त टिप्पणियों और सुझावों को शामिल करने का प्रयास किया गया है। हम डाटा पुरितका के प्रस्तुतीकरण पर रचबात्मक सुझाव का स्वागत करते हैं जो इसके भावी अंकों में सुधार लाने के लिए लाभदायक होंगे। अतः अपने सुझाव कृपया इस पते पर भेजें।

## PREFACE

Indian Council of Agricultural Research (ICAR) is an apex body for organization and management of agricultural research and education in the country which plays an important and effective role towards overall growth of agriculture since Independence.

Information pertaining to agricultural research, education and related aspects available from different sources is scattered over various types of published and unpublished records. These scattered information are being compiled since 1995 in Agricultural Research Data Book (ARDB) through joint efforts of the ICAR-Indian Agricultural Statistics Research Institute (ICAR-IASRI) and Indian Council of Agricultural Research (ICAR). This ARDB 2019 is twenty second edition in the series. It is divided into 10 sections for the purpose of convenience of the users. It provides information on natural resources, agricultural inputs, animal husbandry, dairying, fisheries, horticulture, production, productivity, agricultural engineering, export, import, place of India in world agriculture and human resources. It has 173 tables on different aspects of agriculture. The ARDB 2019 contains the latest information/data as available by the end of June 2019 in the country.

The first edition of the ARDB was published in 1996 consisting of the information up to the end of 1995. Subsequently, an updated version of ARDB is being brought out every year regularly. The ARDB 2019 has some value additions like predicting the future year production of foodgrains, pictorial/graphical representations of data, depicting state-wise data and thematic maps using Geographical Information System (GIS). This issue of the publication has been enriched with latest available information on emerging areas in agriculture sectors. Being a wider acceptability among the users, a soft copy of the ARDB has also been uploaded at our Institute website: [www.iasri.res.in](http://www.iasri.res.in). We are very confident that the information presented in this ARDB 2019 will be useful for users. Efforts have been made to incorporate the comments and suggestions received from various users in this ARDB 2019. Further, we welcome suggestions of the users on the content and the material in ARDB 2019 which will help to enrich the future issues. Suggestions may please be sent to:

**Note :** 1. The net availability of foodgrains is estimated to be Gross Production (-) seed, feed & wastage (-) export (+) import (+/-) change in stocks, 2. The net availability of foodgrains divided by the population estimates for a particular year indicates per capita availability of foodgrains in terms of kg / year. Net availability, thus, worked out further divided by the number of days in a year i.e. 365 days, which is taken as net availability of foodgrains in terms of gram/day, 3. Figures in respect of per capita net availability given above are not strictly representative of actual level of consumption in the country especially as they do not take into account any change in stocks in possession of traders, producers and consumers, 4. Cereals include rice, wheat and other cereals, 5. Pulses include all kharif and rabi pulses, 6. Foodgrains includes rice, wheat, other cereals and all pulses, 7. 3.	<p><b>Plastic Mulch Laying Machine</b></p> <p><b>Suitability:</b> For laying plastic film for mulching &amp; moisture conservation, raising soil temperature for better germination of seed and weed control.</p> <p><b>Capacity</b> : 0.12-0.18 ha/h  <b>Power Source</b> : Tractor (35 hp or above)</p>	
4.	<p><b>Rotary Assisted Broad Bed Former-cum-seeder</b></p> <p><b>Suitability:</b> For seeding of soybean and wheat crops on raised bed. Provision has been made for attachment of rotavator for formation of fresh bed or sowing with reshaping of bed with bed shaper only.</p> <p><b>Field Capacity</b> : 0.35 ha/h - 0.56 ha/h  <b>Power Source</b> : Tractor 50 hp</p>	
5.	<p><b>Sugarcane Bud Chipping Machine</b></p> <p>It is used for extracting the buds from sugarcane. These buds can be used for preparation of bud-chip nursery for planting sugarcane crop. One operator can chip about 1000 sugarcane bud chips per hour.</p>	

S. No.	OPERATION-WISE EQUIPMENT	
6.	<p><b>Vegetable Transplanter</b>  <b>Use :</b> Planting of Chilly, Brinjal, Tomato etc.  <b>Work capacity &amp; description and cost planting capacity :</b> 0.12 ha/h  <b>Required power :</b> 35 hp Tractor  <b>Required man-power :</b> 2 (one labour for each row)  <b>Required seedling tray no. :</b> 2 Kinds of seedling  : Seedling without soil</p>	
7.	<p><b>Self Propelled Multipurpose Hydraulic System for Orchard Operations</b>  Self-propelled hydraulic multipurpose system for medium height fruit trees facilitates orchard management operations like harvesting, pruning, spraying and other canopy management practices in fruit trees such as mango, citrus and sapota. These operations are otherwise difficult, labour intensive and cumbersome.</p>	
8.	<p><b>Arecanut Sheath Shredder</b>  It shreds arecanut leaf sheath into size of 5-8mm without dust. The shredder is power operated with 3 hp electric motor and gives capacity of 100 kg/hr.</p> <ul style="list-style-type: none"> <li>The output size of arecanut sheath shred is 5 to 8 mm, free from dust.</li> <li>It can shred arecanut leaf sheath of different moisture content.</li> </ul>	
9.	<p><b>Power Operated Ribbonner for Jute</b>  It is for removal of jute fibre from green jute stick i.e. freshly harvested jute crop, without retting of jute sticks. This machine is operated by four persons at a time.</p> <ul style="list-style-type: none"> <li>The machine gives output of 100 kg of fibre per hour with 88-90 % ribbon recovery.</li> <li>Reduces water requirement for retting by 20-25 times.</li> <li>Retting time is also reduced to 7-8 days only as against 15-20 days with traditional method.</li> </ul>	
10.	<p><b>Millet Thresher</b>  Suitable for threshing of several minor millets like finger millet, barnyard millet, proso millet, kodo millet, foxtail millet (kodo, kutki, ragi etc.). Can also be used for dehulling of barnyard, kodo and proso millets.</p> <p><b>Capacity :</b> 80-120 kg/h crops  <b>Cost of Operation :</b> Rs. 0.20/kg grain efficiency more than 98%.</p>	

S. No.	OPERATION-WISE EQUIPMENT	
11.	<b>Laser Guided Land Leveller</b> It is used for levelling the field. There is a control unit which guides the machine through a receiver mounted on machine itself. It saves the irrigation by 20-25%.	
12.	<b>Tractor Operated Zero Till Drill</b> Tractor operated zero till drill is used for drilling wheat immediately after the harvest of rice to take advantage of residual moisture, thereby ensuring timeliness for the rabi crop. It forms a thin slit with the help of the inverted 'T' type furrow opener to conserve moisture. Initial land preparation is also avoided.	
13.	<b>Tractor Operated Raised Bed Planter</b> Two raised beds can be made using this machine on which planting is also carried out simultaneously. Fertilizer drilling can also be accomplished on the raised beds. It has a field capacity of 0.4 ha/h. Raised bed cultivation saves water and gives about 15% higher yield.	
14.	<b>Tractor Operated Aero Blast Sprayer</b> Aero blast sprayer has a tank of 400 l capacity and high pressure pumps and a blower operated by pto delivering high volume of spray in orchards to cover the entire canopy.	 <small>Tractor Operated Orchard Sprayer</small>
15.	<b>Tractor Operated Peg Type Puddler</b> It consists of rectangular frame, pegs and three point hitch system. The square pegs mounted on three bars are uniformly staggered to partial helical configuration for better dispersion of soil. The puddler is operated in 50-100 mm of standing water.
