

practices are also indicated to solve this problem.

111. Erasmus, I.L., Madan Lal, Raghunath, B. and Mathur, P.S. 1970. Evaluation of erosion potential from rainfall data. *Indian For.*, 96(11):817-825.

The authors describe a method for estimating EI values from total daily precipitation and maximum intensity data for selected time intervals. The technique suggested would prove useful to technicians and workers in designing and planning of watershed structures.
