

59. Bhambhani, S.P. and Ravender Singh. 1988. Steps that count most. *Intensive Agric.* 1:11-16.

The authors elaborate the importance of soil and water conservation measures in rainfed farming for maximising production on sustained basis. Various techniques such as contour farming, contour bunding, water management, moisture conservation, mulching, water harvesting, crop management and alternative land uses have been discussed.
