

198. **Bhushan, L.S. and Om Prakash. 1987.** Efficiency of conservation practices in preventing soil erosion and runoff at Agra. Abstract No. 10, National Symp. on "Land and Water Management in Ravines", CSWCRTI, Research Centre, Agra, March 19-22, 1987: 9.

Presents the results of a study conducted at Agra to find out runoff and soil loss under different conservation practices viz. *bajra* along slope, *bajra* across slope, *bajra:moong* (2:1) along with cultivated fallow and grass cover of *Cenchrus ciliaris* in runoff plots (30 x 30 m) on 3% slope. Maximum runoff and soil loss occurred from cultivated fallow and minimum from grass cover of *Cenchrus ciliaris*.
