

Dadhwal, K.S. and Pratap Narain. 1988. Agroforestry for soil productivity and conservation-A review. *Indian J. Soil Conserv.*, 16(3): 38-48.

~~The paper reviews the role of trees (woody perennials) on soil productivity and conservation~~

aspects. Research needs under different agro-ecological conditions with location specific agro-forestry designs depending upon the needs of the area have been reviewed. Genetic improvement of tree species and economic and ecological evaluation of the agroforestry system and redesigning of the same are also suggested.
