

222. Dhruva Narayana, V.V., Venkataramanan, C. and Singh, R.P. 1983. Soil and water conservation. *Farmer's Journ.*, 2(12):5-11.

The paper gives an account of soil erosion problems in the country and briefs the readers about soil and water conservation research to find their solutions. The authors describe in

greater details with the support of data and photographs, the conservation technology consisting both mechanical and vegetative aspects, separately for agricultural as well as non-agricultural marginal and wastelands. The training and transfer of technology programmes of CSWCRTI, Dehradun and the progress achieved in these areas have also been highlighted.
