

213. **Dhruva Narayana, V.V. and Pratap Narain. 1985.** Agroforestry programme in watershed management. Abstract No. 65, Voluntary Papers, National Seminar on "Soil Conservation and Watershed Management", New Delhi, Sept. 17-18, 1985: 45.

This paper discusses scope of agroforestry in rehabilitation of watersheds of different regions in the light of land capability classification. Suitable agroforestry systems for different agro-climatic situations in the country have been reviewed. Some aspects of tree/crop interfaces in respect of root compatibilities, competition for light, water and nutrients, have been discussed. Influence of agroforestry system on soil, water and nutrient losses and improvement of soil fertility have been highlighted.
