

297. Mishra, D.D., Sharma, G.C. and Agarwal, M.C. 1982. Response of different doses of phosphatic fertilizers in yield and root development of cowpea on reclaimed ravine terraces. *Indian J. Soil Conserv.*, 10(2&3): 91-96.

An experiment was conducted at Agra to study the effect of different doses of phosphatic fertilizer on yield and root development of cowpea (var. Branco) under rainfed conditions on the phosphorus-deficient soils of reclaimed ravine lands. From the pooled data of three years, the optimum dose obtained was 70 kg P_2O_5 /ha.
