

- 326. Nitant, H.C. and Om Prakash. 1990.** Moisture use efficiency of rainfed mustard as influenced by N rates on terraced fields in ravines. Abstracts 1&2, Internl. Symp. on "National Resource Management for Sustainable Agriculture", New Delhi, Feb. 06-09, 1990: 243.

In the field experiments carried out at Agra, application of 80 kg N/ha resulted in three times higher grain yield of mustard over control and maximum N use efficiency (5.98 to 6.58 kg grain/mm of moisture used), besides highest nutrient uptake.
