

342. **Poornachandran, G., Chinnamani, S. and Jayakumar, M. 1977-78.** Preliminary studies on the effect of different sealant material for the storage tanks to arrest the seepage losses in the Nilgiris. *The Agril. Engineer*, XX: 7-9.

The paper suggests that bitumen spray with 3 mm thick lining was a better sealant for reducing seepage loss but was subjected to seasonal influence of climate. Rainfall and A.P. were the main factors influencing the seepage loss. Predicting equation has been fitted to this effect.
