

357. Prasad, Arjun. 1990. *Basantkaleen ganna aur mung ki mishrit kheti* (in Hindi). *Unnat Krishi*, 29(9): 8-10.

The author recommends taking up sugarcane-*mung* intercropping in spring season (February-March) instead of sugarcane cultivation in winter when other crops like potato, *toria*, gram, pea etc. could be grown. The suggested intercropping system has proved remunerative and beneficial. Cultivation methods of this system have been presented.
