

Prasad, S.N., Sewa Ram and Khybri, M.L. 1988. A note on comparative performance of maize, upland paddy and soybean under different dates of planting in Doon Valley. *Indian J. Soil Conserv.*, 16(1): 61-64.

A study was undertaken at Dehradun to evaluate the yield potentiality and profitability of maize, paddy and soybean under different planting dates. Results showed that among the crops, paddy is more sensitive than maize and soybean when planted at later dates.
