

443. **Samraj, P. and Raghunath, B. 1990.** Environmental security through soil and water conservation management for the hilly and high rainfall regions of Peninsular India. Abstracts, National Seminar on "Conservation of Land and Water Resources for Food and Environmental Security", New Delhi, Jan. 18-20, 1990: 10.

Various research findings of the CSWCRTI, Research Centre, Udthagamandalam (Nilgiris) have been highlighted in this paper besides presenting a description of this tract, problems encountered and solutions identified for the same through a multi-disciplinary research programme on soil and water conservation and watershed management. The need for scientific land use based on land capability classification and watershed management is stressed.
