

and alternate land use systems.

491. Singh, Gurmel, Arora, Y.K., Pratap Narain and Grewal, S.S. 1990. Agroforestry Research in India and Other Countries. Book, Jugal Kishore & Co., Rajpur Road, Dehradun, 189 p.

In this book, the authors have attempted to collect and consolidate the information available on the present position of researches in agroforestry in India and trend elsewhere in the world. Beginning with a historical account of agroforestry and its need, the text comprehensively reviews the researches of various agroforestry systems in five agro-climatic regions. These have further been covered under agri-silvi, silvi-pastoral and agri-horti systems. An attempt has also been made to focus the trend of researches going on in Asia, Africa, America, Europe and Oceania so as to draw
