

- 543. Sud, A.D., Singh, Pratap and Mittal, S.P. 1983.** Land and water management for maximising agricultural production in Shiwalik foothill areas. National Symp. on "Watershed Management for increased productivity in Red and Black Soils". CSWCRTI, Research Centre, Bellary, Feb. 07-09, 1983.

Problems of Shiwalik foothills and suitable soil and water conservation measures have been discussed. It has been suggested that conversion of sloping fields into level terraces, provision of safe disposal of excess rain water, its collection in dugout ponds and recycling it back to the fields for supplemental irrigation is the only answer for increasing agricultural production in the tract.
