

- 512. Singh, Ravender and Bhardwaj, S.P. 1984.** Control erosion of soil and its health for maximising agricultural production. *Farmers and Parliament*, November, 1984: 27-30.

Describes ill effects of soil erosion on the productivity of land leading to land degradation, wastelands, desertification and related problems. It also highlights various soil and water conservation measures which include agronomical, mechanical, afforestation and other vegetative methods by which soil erosion can be kept under control.
