

572. Tyagi, P.C., Mohan, S.C. and Singh, Gurmeh. 1993. *Parvatiye barani kshetron mein satat krishi prabandh evam utpadan* (in Hindi). *Unnat Krishi*, 6:9-14.

In this brief article in Hindi, the authors have identified the causes of low crop yields in hilly areas under rainfed conditions. These include lack of improved varieties, non-use of fertilizers, lack of moisture in the soil, etc. Improved agronomic techniques suitable for HP, UP hills, foothills and sloping lands to improve crop yield levels have been described.
