

615. **Arora, Y.K. 1991.** Citrus fruits for reclamation and development of degraded lands in Doon Valley. Abstracts, 10th National Citrus Seminar, Indian Society of Citriculture, New Delhi, Dec. 20-21, 1991: 16

Discusses an experiment in which large number of citrus fruit crops were tested in riverbed bouldery lands of Doon Valley under rainfed/protective irrigation conditions during 1972-90. Eighteen years old trees of sweet orange cv. Malta Blood Red (104 fruits/tree) and Mosambi (130 fruits/tree) lemon Cv. Eureka Round (105 fruits/tree) and Eureka Long (136 fruits/tree), Pummelo (101 fruits/tree), Kinnow (364 fruits/tree) showed suitability for economic utilization. Economic analysis at 10% discount rate indicated the profitability of lemon Eureka Round and Kinnow providing B:C ratio of 1.4 and 2.1 in such lands.
