

632. Chinnamani, S. 1968. Grasslands on Bellary black cotton soils. *Indian For.* 94(3): 225-229.

The paper gives an account of the ecological study on the grasslands in Bellary (Karnataka) region. The investigations confirm the earlier findings and typify the group as a distinct

sub-type under *Sehima-Dichanthium* type. Composition, species, production evaluation and economic data are presented. Large-scale grassland farming under rainfed condition has been suggested.
