

- 647.** Dhruva Narayana, V.V. and Ram Babu. 1984. Economic viability of tree grass crops on highly eroded soils. SPWD-NABARD Seminar on Economics of Wasteland Development, Surajkund, March 08-10, 1984: 37-46.

The paper discusses soil and water conservation, and watershed management technologies developed by CSWCRTI, Dehradun and its regional research Centres. The economic viability

of some of these measures as implemented in various Operational Research Projects has also been elaborated with the support of research data.
