

- 693.** Kamannavar, H.K., Singh, A. and Shah, K.A. 1977. Evaluation of contour and peripheral bunds for their stability in ravines. *Soil Conserv. Digest*, 5(2):23-28.

Deals with contour and peripheral bunds tried for ravine control works at Soil Conservation Research Centre, Vasad (Gujarat). It reveals that rate of reduction of bund section increases with the increase in size. Reduction rate in cross sectional area and height of the bund was found to be 253, 324, 493 cm²/year and 1.71, 2.53 and 2.93 cm/year for 0.74, 0.93 and 1.28 sq m cross sections respectively
