

762. Rege, N.D. 1956. Place of grass and legume in Soil Conservation. *J. Soil & Water Conserv. India*, 4:139-143.

Enumerating the reasons for the soil, runoff and nutrient losses, the paper highlights the role of grasses and legumes in the agricultural system of the country. Suitable grasses and legumes can be successfully incorporated in our cropping system by adopting methods like strip cropping. The combination of agronomic with mechanical control measures can make agriculture a paying proposition.
