

893. **Gupta, S.K., Wasiullah, Ram Babu and Nayal, M.S. 1971.** Comparison of performance of expensive raingauges of different diameters. *Indian For.*, 97(4): 216-218.

Study conducted to find suitable raingauge indicated that the cylinder having diameter of 7.5 to 12.5 cm record comparable data with standard raingauge when installed at any height varying from 30 to 90 cm. The use of diameter less than 7.5 cm is not desirable as recording is not accurate.
