

884. **Ghosh, Sandip and Singh, Gurmel.** 1981. Soil crust-A review. *Indian J. Soil Conserv.*, 8(2): 123-129.

The paper discusses the problem of formation of soil crust and the work done to find out the causes of its formation, methods to correct it and to quantify the amount of damage done by soil crusting to crops. Although there are wide differences among soils in their susceptibility to crusting, there is no complete definition of the soil properties that govern crust characteristics.
