

- 908. Mathur, B.S., Singh, Ranvir, Goel, N.K., Tiwari, A.K. and Kurothe, R.S. 1993.** Rainfall-runoff-erosion modelling for Indian watersheds. Proc. Nat. Sem. on Hydrological Hazards-Prevention & Mitigation, Roorkee, March 17-18, 1993: 1.1-1.8.

The paper deals with various hydrologic models based on the size, shape and general physiography of the watershed. Keeping in view the vastly different meteorological, hydrological and physiographic conditions of Indian watersheds, a "package of models" has been proposed to be developed for estimation of runoff and sediment yields. The flow chart of the proposed model has been presented.
