

958. **Tamhane, R.V., Wasiullah and Dalal, S.S.** 1969. Preliminary analysis for calibration of five small watersheds. *Indian For.*, 95(7):461-469.

The paper deals with five watersheds in Doon Valley, ranging from an area of 11 acres which were selected to study their hydrologic behaviour under different land uses in relation to water yield, peak discharge and sediment production, to evaluate the effect of watershed treatment, measures on reduction of soil and water losses, to study the processes involved and to develop design criteria for engineering structures for soil and water conservation.
