

- with the application of supplementary irrigations from the stored water.
- 1061. Tyagi, P.C., Ashok Kumar, Joshi, B.P. and Singh, Gurmel 1993.** *Uttar pasch parvatiye kshetron mein varsha jal prabandh* (in Hindi). *Unnat Krishi*, 3:3-6.

The article, in Hindi, deals with improved water management techniques and rainwater harvesting in the north-western hill regions. It is indicated that 25 per cent of rainfall runoff water could be effectively harvested and stored into tanks, farm ponds, etc. for saving supplemental irrigations to the crops. Utilization of this water for increasing crop yields has been demonstrated with support of data. Methods to control water loss during
