

- 1066. Yadav, R.C., Bhushan, L.S. and Lal, B. 1990.** Water harvesting in gullied lands for horticulture plantation. Proc. Internl. Symp. on "Water Erosion, Sedimentation and Resource Conservation", Dehradun, October 09-13, 1990: 262-267.

The sloping lands along gullies which can not be developed economically for agriculture offer good potential for horticultural crops with adoption of suitable land and water management practices. Studies on development of such sites into micro-catchments for water harvesting by compartmental levelling and their hydrological behaviour is reported here.
