

- 1107. Dadhwal, K.S., Singh, B., Katiyar, V.S. and Dwivedi, V.K. 1991.** Characteristics of limestone mined lands-A review. *Indian J. Soil Conserv.*, 19(3):79-82.

An attempt has been made to document the information on the characteristics of limestone degraded mined lands in the Western Himalayas. While doing so, geo-characteristics, physico-chemical properties, minespoil/debris flow and rainfall volume relationship, and effect of rehabilitation measures in improving the quality of water deteriorated due to mining and some other topics have been dealt with.
