

- 1121. Juyal, G.P. and Samra, J.S. 1997.** Eco-restoration of mined areas through soil and water conservation technology. Proc. National Seminar on Eco-friendly Mining in Hilly Region and its Socio-economic Impacts, Shimla, June 6-7, 1977. Pubs. Mining Engineers Assn. of India, Himalayan Chapter, Shimla: 238-245.

Various soil and water conservation measures, both engineering and vegetative, adopted for reclamation of abandoned mined areas in hilly regions particularly the Sahastradhara area in Mussoorie hills, mined for limestone, have been described. These also include protective measures. The paper also discusses the impact of such measures on the restoration and improvement of the environment of these areas.
