

potential in the area as reflected in the overall benefit-cost ratio of 2.00 in the watershed.

- 1172. Prasad, S.N., Prakash, C., Gadekar, H., Rao, D.H., Singh, R. and Raghupati, R. 1990.** Watershed management for sustained productivity-A case study of Chhajawa Watershed in south-east Rajasthan. Poster Session, Internl. Symp. on "Water Erosion, Sedimentation and Resource Conservation", Dehradun, Oct. 09-13, 1990.

Chhajawa watershed in Kota district of S.E.Rajasthan is one of the 17 watersheds taken up by the CSWCRTI for planned development of resources. The B:C ratio of the project for crop production which was 1.96:1 in 1985-86 has increased to 4.1:1 in 1989-90, confirming
