

1189. **Basu, J.K., Narayanswamy, S. and Rege, N.D. 1956.** Land use planning for the Nilgiris. Part I-Soil Conservation Survey. *J. Soil and Water Conserv. India*, 5(1): 25-35.

Gives information on the broad reconnaissance survey of Nilgiris district carried out on catchment basis alongwith necessary particulars of soil, land use practices, farming history, topography, vegetation, degree of erosion, etc. With these as basis, detailed soil conservation survey was conducted at a selected sub-catchment of Ketty stream in Ketty Valley, representative of the plateau; and inventory maps were prepared showing all the particulars

of topography, land use, soil type, degree of erosion, etc.
