

1225. **Dhruva Narayana, V.V., Venkataramanan, C. and Singh, R.P. 1983.** Watershed management- minimum erosion and maximum benefit. *Soil Conservation Newsletter*, CSWCRTI, Dehradun. 2(3):3-10.

The paper discusses at length the components of watershed management, various aspects of soil and water conservation technology suitable for different types of land sites and the shortcomings and constraints of soil conservation programmes. It provides a number of photographs which clearly depict the soil erosion problems as well as the improved technology.
